MISS BURDETT COUTTS AND HEE TENANTS -Miss Coutts has been at great trouble and expense in getting tenants in Columbia square. Bethnal-green, put upon the electoral register as voters for the new borough of Hackney Still further to add to their foliness of knowledge respecting the relationship existing between "owners" and "occupiera" of houses and tenements under the new Reform Act, she has had printed, and distributed amongst her tenantry, an extract from an important circular addressed by the Poor Law Board to the overseers of parishes. The tenantry, sensible of the importance of the communication which they had received from their landlady, held a meeting on December 17. at which a resolution was upanimously adopted, expressing opinion that Miss Burdett Coutts was descrying of the grateful thanks of her tenantry for having sailed obtaining the benefits of citizenship, and for having voluntarily defrayed all the expenses attendant upon their being put upon the electoral roll. It was further resolved

that, in honour of the generosity of their land-

lady, all the buildings in Columbia-squareshould

be illuminated on Saturday, Jnn. 4, 1868. On

Saturday this last resolution was carried out

most successfully.

PLEASANT WEATHER. A phenomenon come mon enough in Canada, says the Specialar of Jan. 18th, but very rare in England, occurred this day week on the Chiltern Hills, -an icestorm.—in other words a fall of rain which frozo as it fell, so as to adhere tightly to any object it touched, in the form of many times its weight of ice. The gentleman who relates his experiences in Tuesday's Times says, "I do not believe that a single drop of rain left it (my umbrella) during the three hours I was out, and when returned home it was one bright sheet of ica. One twig which this gentleman brought home from a ledge weighed "ten parts ice to one of wood," and this was "by no means exceptionil." The gates were covered with icicles, not banging straight down, but inclined towards the north at an angle of 30 dec to the bars of the gate, the angle at which the strong gale blowing had slanted the rain before it froze. Some of the trees were frozen so stiff and deep in ice that they did not bend to the wind at all; others shook off their icicles with a rattle on to the icy grass every hinds of which was conted with a thick case of the same mail. "The "general aspect of the country," says the writer. was such as to dely my description. It was as if every object had been suddenly dipped in
